- PHP
- Angular
- CSS
- SQL

PROJECTS

Cake Shop Website
- Designed a visually appealing and responsive website using HTML, CSS, and JavaScript.
- Focused on an elegant UI/UX with animations and a well-structured layout.
- Implemented basic interactivity, including Add/Remove items functionality and a dynamic billing system.

Clinic Management System
- Designed and implemented a SQL-based database for managing patient records, doctor schedules, and appointments.
- Optimized queries for faster data retrieval and ensured data integrity with constraints and relationships.
- Used stored procedures and triggers to automate routine tasks like appointment reminders.

student managment system
- A web-based system designed using React and JavaScript for managing student records.
- Allows admins to add, view, edit, and delete students with a clean UI.
- Utilizes localStorage to store data permanently across sessions.
- Features include searching students, marking attendance, and exporting data to CSV.

Chai Hub - React Native Tea Ordering App

- A mobile application built with React Native for ordering tea and snacks from local stalls.
- Features user login/signup, stall selection, menu browsing, and cart-based ordering.
- Includes real-time features like order tracking, live status, and order editing within 1 minute.
- Users can view order history, give ratings & feedback, and pay via COD or online.
- Working on adding map-based stall search, Excel import for menu, and dashboard with charts.
- Currently developing the UI and integrating core functionalities step by step.

ACHIEVEMENTS

Certificate in angular flutter and cybersecurity sessions

Ulhasnagar, India
